ENCRYPTED GODS

I. ABOUT ENCTRYPTED GODS

Collect. Play. Earn. Create.

Encrypted Gods is an NFT collection of uniquely generated Elemental Pixel Art Fighters on the Ethereum Blockchain. The 1st generation consists of 9,999 avatars.

Each Encrypted God minted will be game ready with our planned game modes as well as special level-up mechanics. We have planned to release a Beat-Em-Up style PVP mode, Dungeons that you can fight your way through with friends, and a quest based Metaverse unlike any seen before!

Be one of the first 2,222 minters to be entered into a pool for a parcel in our first city.

ENCRYPTED GODS
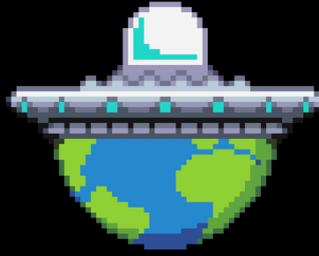

II. STORY OF ENCRYPTED GODS

Welcome to the year 2030. Several wars are taking place on Planet Earth for the last natural resources and messages have been received that an alien race is on the way. Over the years, several groups have formed to survive. Be warned, not all of them are well intentioned. With the current state of the world, the highest elite of ancient gods have reincarnated and are ready to restore peace on Earth.

With the rebirth of the Gods, hidden ancient technology has surfaced and new powers are now in the hands of society. The only way to survive is to find your group, fight your way through the metaverse, and grow from these chaotic times. Are you ready to take on the forces that are responsible for the separation of humanity? CHOOSE WISELY!!
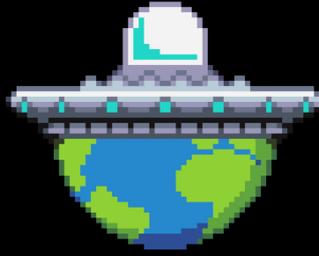

ENCRYPTED GODS

III. OUR VISION

In todays world, you have people becoming rich off crypto and people homeless/hungry. Being fans of mythology, fans of gaming, and forward thinkers - we came together with the idea to make a never before seen gaming style of NFTs as well as create a token/charity foundation to help fight the negative positions taking place in society.

Another piece of our vision is to enlighten the players about different cultures through gameplay, unspoken history, and sourcing cultural information from members in the community to help open the minds of people who may not have been aware of such prior.

ENCRYPTED GODS

IV. ENCRYPTED VAULT

As per our Roadmap, we will be using 50% of the funds for the development of the game, metaverse, and tokenomics.

Within this vault, we will also be purchasing land in other projects to expand our meta presence and broaden our reach to users in the space.

We plan for 2 wallets initially to act as our vaults, one for the community/game and the other for marketing. Only transactions made to progress the Vision of The Gods will be made from these wallets.
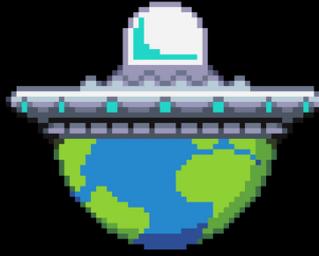

ENCRYPTED GODS

V. CRYSTALS AND GODS?!

Planned in our roadmap we will be airdropping 15 1-of-1 Gods to lucky members. Not only will these be unique in character representing 15 known Gods, but will hold special capabilities in our game. Check our website to see when Gods are unlocked and airdropped.

Along with the Gods, we have introduced a new special element to be used in game which will be available ONLY to holders, our Crystals! There will be 3 different tiers of the Crystals as well as a certain amount of each tier being available, including the top tier being 1 OF 1!! Mint some Encrypted Gods and join our community today to be one of the lucky ones to obtain this prized possesion.

Both the Crystals and Gods will be a separate NFT collection airdropped to the community.

ENCRYPTED GODS

VI. ENCRYPTED CHARITY

With our goal to help Planet Earth in the ways that we can, we aim to create a charity in which we will fund over time and use community voting for how to distribute.

1% of our planned 5% secondary sales royalty will go directly to a wallet for the charity.

With the lands we mentioned in the "Encrypted Vault" page, we will be using these parcels (land) as headquarters to outreach our mission and expand our presence to other members of the community.

ENCRYPTED GODS

VII. E.G. TOKEN

As to align with our vision for Encrypted Gods to be a metaverse in the future, it's only right that we have a token to go with it. The tokenomics is already undergoing planning and will be used in-game to participate in the ecosystem, purchase parcels, and enjoy the festivites that we have planned.

There will be a few ways that you can earn our token: playing the game and leveling up, swapping, and staking. All further information will be released as we reach milestones in the development roadmap.

ENCRYPTED GODS
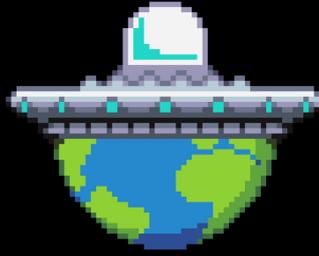

VIII. STAKING

To further reward holders and members of the community, we will be implementing a staking mechanism. Staking will enable our members to earn our token for use in the game as well as allow non-holders to participate in what we are creating by "renting" a holders NFT for use.

As we are finalizing the details on how we wish to deliver this to the community, further information can be expected to be released in our Discord and on our social media.

Be ready for the power to come back to the players!

ENCRYPTED GODS

IX. YOUNIVERSE

They say leave the best for last, right? The "Youniverse" is our planned metaverse where players can meet, go on missions, explore dungeons, host player fights, and build their own creations with their parcels.

Our native token will be the main currency and we have so much in store for the future of Encrypted Gods. In order to prevent competitors from stealing our ideas, all that we have planned will be released in time, with holders being the first to know the plans.

ENCRYPTED GODS
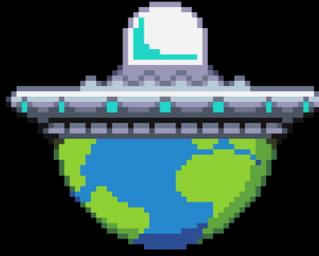

X. THE ARENA

Make sure you build your squad up or find friends to create the strongest team. One of our features we look forward to is The Arena. Here, we will have players of the community come together for tournaments, weekly battles, and test who is growing to be the strongest Encrypted God.

Think you have what it takes to reign supreme on the boards? Test your might and find out.
